

Verifying Information Before Sending a BCA

Here are the steps we follow before sending a Broker Carrier Agreement (BCA):

We need to have a Driver assigned to Drivers Assignment section

We make sure the driver is assigned as "Dispatched" in Driver's assignment details

we make sure to have an email added on driver's assignment detail

.In the Carrier management details, we verify that we have:

- The company name: The name of the carrier company the driver belongs to.
- Their MC Number
- Their DOT Number

- ♦ If the MC Number is used, it means the load is moving between states.

At STT, the **DOT# is mandatory** for all drivers, while the **MC# is optional**.

If a driver only has a DOT#, the load must **only be moved in the same state**.

- Their address: it must be the Principal place of business in MOTUS

We verify that the carrier is authorized on MOTUS using the DOT#.

both, the DOT and the MC# when we use the MC# must be authorized.

We find the MC# ([Motor Carrier of Property \(Except Household Goods\)](#)) in MOTUS in the Operating Authority registration(s) section

- **Address:** Must match exactly with the address found on **MOTUS, in the principal place of business section**. Only the **principal place of business** is accepted.

We check that there is no previously signed BCA in the driver's profile.

If there is one added on files, we confirm it has the current driver's information and that it's been properly signed by the driver.

Once all the information has been verified,
and the shipment meets the necessary conditions to send a BCA,

- ✔ We proceed to send the Broker Carrier Agreement.
